GOALS & OBJECTIVES

Investment Return Objective

“Its primary goal is to provide promised benefits to participants and beneficiaries of the MWRA Employees’ Retirement system. Plan assets should be equal to or greater than the present value of the projected benefit obligations (“fully funded”). When Plan assets are less than the present value of projected benefit obligations, a schedule will be established and a plan will be in place to meet a fully funded status. When achieving return objectives required to fully fund the system, the Board is intent on controlling risk. Consistency of returns and risk of loss are primary considerations. The Board has also determined that the annual performance of plan assets should not vary substantially from returns achieved by other public pension funds with similar goals and objectives.”

Return Expectations

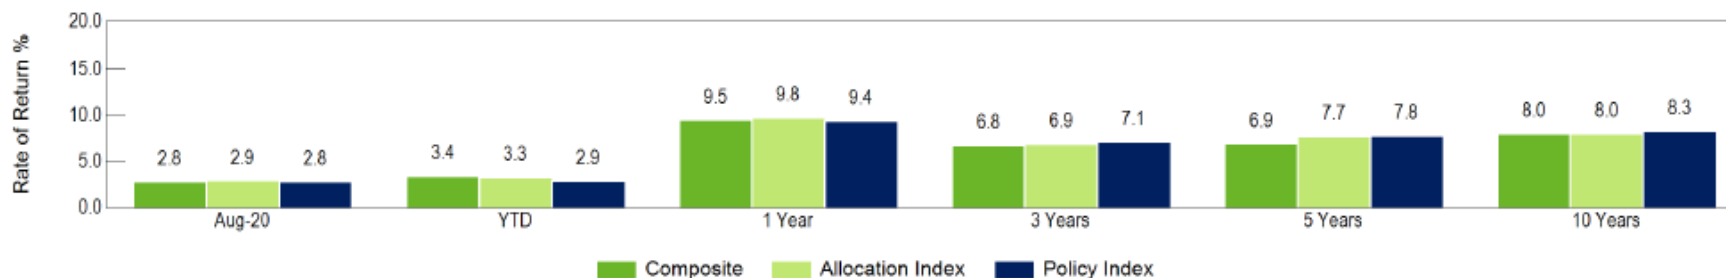

The investment growth should be maintained in such a manner that the minimum nominal rate of return does not cause a negative real rate of return over a full market cycle:

- **Time Horizon:** Return assumptions will be based on a ten year time horizon with a detailed review and analysis to be made at least annually to monitor allocations and assumptions. Should a manager deviate from proscribed mandate or expected risk and return profile by a consequential degree, that manager may be reevaluated at any time.
- **Liquidity Needs:** Presently contributions exceed plan withdrawals to provide benefits, payouts, and/or plan expenses. Portfolio liquidity will be managed based on the cash flow needs of the System.
- **Regulatory Considerations:** Assets of this Fund shall be invested in a manner consistent with the fiduciary standards established under Code of Massachusetts Regulations 840 (“840 CMR”). The Board shall also use as precedent the Employee Retirement Income Security Act (ERISA).

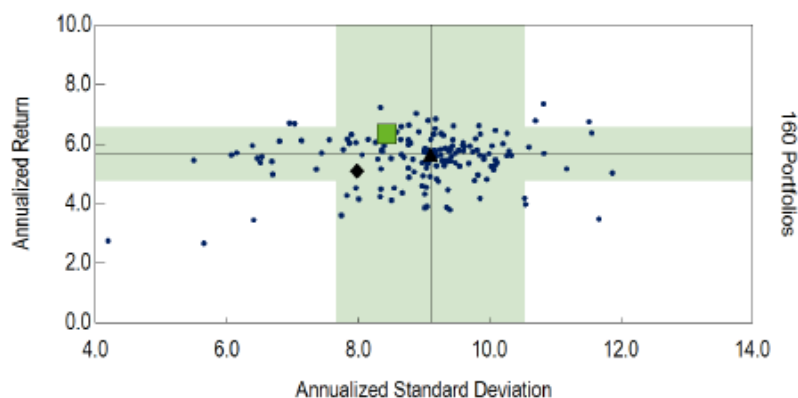

EXECUTIVE SUMMARY

Net Return Summary Ending August 31, 2020

20 Years Ending June 30, 2020

Performance

- The Composite returned 2.8% for the month underperforming the Allocation Index and performing in line with the Policy Index which returned 2.9% and 2.8% respectively.
- Equities continued their winning streak in August—marking the fifth straight month of gains—amid improving investor sentiment bolstered by ongoing stimulus. The S&P 500 Index returned 7.2%, gaining in all but five trading days, for the month. Non-US equities benefited from ongoing weakness in the dollar with the MSCI EAFE and MSCI Emerging Markets indexes up 5.1% and 2.2%, respectively. The portfolios Domestic Equity returned 6.6%(net) ,outperforming their global counter-parts, non US equity which returned 4.4% (net) for the month.
- In fixed income, inflation expectations rose, leading to an uptick in global yields. The Fixed Income Composite returned -0.1% (net) for the month while the BC Agg and BC US HY returned -0.8% and 1.0% respectively
- This brings the overall performance on a trailing one year period return to 9.5%, while the allocation and policy index returned 9.8% and 9.4%, respectively for the same period.

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC generally reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of return are annualized when the time period is longer than a year. Performance is presented gross and/or net of manager fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.
